

## **CHAPTER - 12**

### **WATER RESOURCES**

12.1 With short and erratic monsoon, Rajasthan is the most water deficient State in the country. The severity of this can be best appreciated by the fact that with 10.41% of area, 5.49% of population; Rajasthan has only 1.04% of available water resources. While the development of water resources has always been the first priority for Rajasthan, the efforts have nevertheless been hampered due to non-availability of adequate resources.

12.2 The State is faced with peculiar topographical extremities - hostile desert, rough Aravali ranges, practically no perennial river, tribal/hilly area and recurring famine conditions due to scanty rainfall. The rivers of the State are rain fed and identified by 14 major basins divided into 59 sub-basins. The surface water resources in the State are mainly confined to south and south-eastern parts of the State. There is a large area in western part of the state which does not have any defined drainage basin. Thus the water resources in the state are not only scarce but have highly uneven distribution both in time and space. The State is overwhelmingly rural, with 76.61 % population living in the rural area. The major part of this rural population is dependent on agriculture which mainly depends upon water availability for irrigation purpose.

12.3 The ground water also plays an important role especially in agriculture and drinking water supply. The situation of ground water exploitation is also not satisfactory as in areas where surface water is used for irrigation purpose. There is a tendency of not using ground water for agriculture which creates problem of water level rise and even water logging. On the contrary, in large areas of the State, ground water is being over exploited and the water level is depleting at alarming rate in most of the area except in canal command area. There are 15 defined river basins in the State. The total available surface water in the State is 21.71 BCM. Only 52% of the surface water has been harnessed.

12.4 The above background drive the following priorities and activities for water resources development and management:-

- o Development of all utilizable water resources to the maximum possible extent, including surface water - local and imported - groundwater and waste water, for optimal economic development and social well-being.
- o Assuring an integrated and multi-disciplinary approach to planning, evaluation, approval and implementation of irrigation and drainage projects, including river basin management.
- o Optimum utilization of water resources to maximize production in all user sectors.

- Providing flood protection and drainage facilities, as well as assuring minimal supplies during drought periods.
- Ensuring proper functioning of existing structures, conveyance systems and other assets through adequate maintenance and operation.
- Minimizing adverse impacts of water resources development on the natural environment and on population affected by project implementation works.
- Promoting beneficiaries' participation in all aspects of water planning and management, with particular emphasis on Water User Associations intended to manage and maintain irrigation systems, both physically and financially.
- Advancing the technological and scientific level of all the staff in the water sector through intensification of applied research, technology transfer, training and education.
- Facilitating private initiative in development, operation and management of water projects.

12.5 The State Government is committed and endeavors to implement the following in irrigation sector in coming years:-

1. To increase irrigation potential by 1.00 lac hectare through various irrigation projects.
2. Looking to the scarcity of surface water, the government will encourage drip and sprinkler irrigation system.
3. Irrigation facilities will be extended by renovation of old water harvesting structures like- wells, lakes, ponds, anicuts, nadi etc.
4. All ongoing projects will be completed at the earliest possible.
5. A special Action Plan would be prepared for Conservation of Rivers, Lakes and Ponds of the State.
6. Strengthen of all the distributaries connected with main canal of Chambal Command Area.

12.6 The State Government has laid emphasis on harnessing of maximum water resources by investing funds during all Plan periods. Irrigation potential has been increased from 4.00 lakh hectares to the tune of 35.79 lakh hectares with the construction of 118 Major and Medium and 3287 Minor Irrigation Works up to March, 2008. One medium irrigation Projects namely Gardada and 10 Minor Irrigation Schemes has been targetted to be completed during 2008-09. Work on 3 Major Irrigation Projects (RWSRP, Gang Canal Modernisation and Narmada), 5 Medium Irrigation Projects (Gardada, Takli, Piplad, Lhasi & Gagrin) and 61 Minor Irrigation Works are in progress.

### **Eleventh Plan and Annual Plan Outlays for Irrigation Projects**

12.7 An outlay of Rs. 5377.22 crores has been kept for major, medium and minor irrigation projects (excluding IGNP & CAD) in the XI Five Year Plan 2007-12. An expenditure of Rs. 548.09 crores is likely to be incurred

in 2008-09 (excluding IGNP & CAD); an outlay of Rs.633.44 crores is proposed for various ongoing irrigation projects in Annual Plan 2009-10. Major Head wise outlays are summarized as below:

Table No. 12.1

(Rs. in lacs )

S. No.	Category of Projects	XI Plan Outlay	Anti. Exp. 2008-09.	Proposed Outlay 2009-10
1.	Multi Purpose Projects	13130.11	2871.30	29.60
2.	Major Projects	288928.15	23803.68	33059.75
3.	Gang Canal (Modernisation)	8763.02	2500.00	2000.00
5.	Medium Projects	84500.05	8000.00	5500.00
6.	Minor Irrigation Works	98585.13	10481.04	20985.05
7.	Water harvesting structure	27500.01	6000.00	500.00
8.	Flood Control Works	3650.00	180.00	200.00
9.	Water Management Services	12665.22	973.05	1069.63
Total		537721.69	54809.07	63344.03

12.8 Project-wise details are as follows:

### **Multipurpose/Major Irrigation Projects**

#### **Mahi Project**

12.9 Mahi Bajaj Sagar multipurpose project is an interstate project between the States of Gujarat & Rajasthan for the development of irrigation & power generation. This project would provide irrigation in 80 thousand hectare land. The work on main components of the project was started in the year 1972-73. The latest estimated cost of this project is Rs. 930.00 crores, out of which an expenditure of Rs. 895.12 crores had been incurred up to March 31, 2008 and the project has been completed. An expenditure of Rs.28.47 crores is likely to be incurred to complete remaining works of the project in 2008-09.

12.10 The ultimate CCA of the project is 0.80 lac hect which has been created up to March 31, 2008.

#### **Narmada Project (AIBP)**

12.11 Narmada Canal Project was taken up to utilize 0.5 MAF of Narmada water allocated to Rajasthan. This water will be available to Rajasthan from Sardar Sarowar Project, under construction in Gujarat. The share of water will be delivered at Rajasthan-Gujarat border through 458 Km long Narmada Main canal (NMC). 358 Km of this canal is complete in all respect and the work in last stretch of 100 Km is in progress. The canal system in Rajasthan would provide irrigation in 2.46

lac hectare by adopting improved method of irrigation i.e. sprinklers irrigation system which is mandatory in this project.

12.12 This project would provide drinking water facility to 1107 villages & 2 towns. The project was cleared by Planning Commission in the year 1992 with the condition that the environment impact assessment (EIA) would be done. The EIA of this project was done by WAPCOS and it was found that it is likely that some of the area may be water logged. Therefore the concept of the project was rethought and the project was formulated by TAHAL Consulting Engineers, Israel.

12.13 The Revised cost of the project has been approved by Planning Commission for Rs. 1541.36 Crores. This cost includes Rs. 222.57 Crores as share of PHED for providing the drinking water to the command area and outside the command area. The latest estimated cost of the project is Rs. 1975.29 crore out of which an expenditure of Rs. 1220.24 crore had been incurred up to March 31, 2008. In the year 2008-09, an expenditure of Rs.150.40 crores is likely to be incurred. A provision of Rs. 178.00 crores is proposed in Annual Plan 2009-10. The project is likely to be completed by March 2010.

12.14 The State Government has committed that in coming years the unirrigated area of Jalore and Barmer district would be converted in irrigated area through the water of Narmada.

12.15 The canal system would provide irrigation in 2.46 lac hectare on completion. Out of which CCA in 0.88 lac hectare has been created up to March 31, 2008. The target for creation of CCA for the year 2008-09 is 0.86 lac hectare.

### **Bisalpur Project**

12.16 Bisalpur major project is irrigation cum drinking water supply project. The dam has already been constructed across river Banas near village Bisalpur in district Tonk to provide irrigation facility in an area of 81.8 thousand hectare and to provide drinking water to Jaipur, Ajmer, Beawar, Kishangarh, Nasirabad & other enroute villages. The revised estimated cost of the project (at March 2000 prices) is Rs. 657.91 crores, against which an expenditure of Rs. 690.62 crores had already been incurred up to March 31, 2008. The project has been completed in the year 2007-08. An amount of Rs. 17.73 crores is expected to be spent on the project in 2008-09. A provision of Rs. 7.94 crores is proposed for the project in the year 2009-10.

12.17 The state Government has committed that in coming years, the CCA of LMC and RMC of Bisalpur project would be extended and systematic efforts would be made to irrigate the maximum land of the farmers of the Tonk district.

12.18 The ultimate CCA of the project is 0.82 lac hectare which has been created up to March 31, 2008.

### **Ratanpura Distributary**

12.19 Ratanpura distributary work was started in the year 2000-01 to provide irrigation facilities to cultivators of left over area of Sidhmukh & Nohar Irrigation project. The estimated cost of the project is Rs. 27.53 crores and ultimate potential is 18 thousand hectares. The project has been completed during 2007-08

12.20 An expenditure of Rs. 22.35 crores had been incurred up to March 31, 2008. In the year 2008-09, Rs.12.00 lacs are expected to be spent.

12.21 The ultimate targeted CCA of the project is 0.18 lac hectares which has been created up to March 31, 2008.

### **Rajasthan Water Sector Restructuring Project (EAP)**

12.22 This major project was conceived for the improvement of selected surface irrigation system to improve performance efficiency. The project envisages strengthening of the existing irrigation projects up to designed standards. The Water User's Association (WUA) will do the management of the project, after completion of all rehabilitation works. The total cost of this project is Rs. 733.6 crores of which World Bank assistance would be to the tune of Rs. 590.00 crores. It is proposed to rehabilitate 91 projects covering an area of 619.95 thousand hectare. This project also envisages taking up remedial works of 16 identified large dams, which are in distress. The work on this project was started in the year 2002-03. An expenditure of Rs. 68.69 crores is likely to be incurred in 2008-09. A provision of Rs.143.86 crores is proposed for this project in the Annual Plan 2009-10. The EAP is likely to be extended up to March 2010.

12.23 Since it is a rehabilitation project only, therefore no target was set up for additional irrigation potential by this project.

### **Indira Gandhi Nahar Project**

12.24 The Indira Gandhi Nahar Project is a very typical and one of the most gigantic projects in the world aiming to de-desertify and transform desert waste land into agriculturally productive area. For the convenience of the administrative control & construction, the project has been divided in two stages. The 204 KM. long feeder and main canal up to 189 KM. along with its distribution system (except Sahwa Lift system) falls under Stage-I.

12.25 The State Government is committed and endeavors to implement the following in Indira Gandhi Nahar Project in coming years:-

1. Repair and modernization would be taken up in IGNP stage I which is called as Rajasthan Feeder.
2. The water would be made available to Churu district by completing the under construction work of IGNP.

12.26 It is proposed to complete the Indira Gandhi Nahar Project stage I & II during the Eleventh Five Year Plan by lining of 1330 km and opening of 353 thousand hectares of CCA for irrigation.

12.27 The main priority is to provide drinking water in the command area as well as the adjoining & enroute villages & towns of western Rajasthan besides irrigation. The level of water for drinking, industrial, military and energy purposes is likely to increase to 1.35 MAF instead of 0.87 MAF at present. The following changes are proposed to improve the overall irrigation efficiency of IGNP:

- Use of Sprinkler Irrigation for reduction in water losses.
- Introduction of Participatory Management through formation of Water User Associations.
- Encouraging adopting crops requiring less water.
- Provision for upgradation & renovation of main canal & distribution system.
- Enhancing water tariff for irrigation, drinking & industrial use so that O&M cost is recovered.

12.28 During the year 2008-09, an expenditure of Rs. 163.45 crores is likely to be incurred on IGNP. The Indira Gandhi Nahar Project will provide irrigation facilities in 19.63 lac hectares of which 16.14 lac hectares cultivable command area had already been opened for irrigation up to March 31, 2008; and 0.19 lac hectares area is likely to be opened in 2008-09. Apart from this, works for improving efficiency of the system has also been taken in hand under Twelfth Finance Commission grants. This includes pilot project from sprinkler irrigation, computerization of control structures of project for head to tail, improving communication facilities, construction of ditch channels, atomization of gates of control structures, construction of balancing reservoir etc. On completion, these will result in saving of water and better water distribution management. These works are likely to be completed in 2009-10.

12.29 It is proposed to open 50 thousand hectares CCA in the year 2009-10 and continue the works for improvement in efficiency of the system as above, with the expenditure of Rs. 231.23 crores, of which Rs.119.20 crores is proposed to be received from Twelfth Finance Commission grants. A provision of Rs.212.56 crores is proposed for this project in the Annual Plan 2009-10.

### **Modernization of Gang Canal**

12.30 The Modernization of Gang Canal project is under operation since 1927 to provide irrigation in Ganganagar district. The canal system had deteriorated over the years. The project was prepared for the lining of Bikaner canal in the Punjab and canal system in Rajasthan portion. The project was started in 2000-01. The estimated cost of the project is Rs. 445.79 crore. The cost of this project has been revised to Rs. 591.76 crores, out of which an expenditure of Rs. 382.09 crores had been

incurred up to March 31, 2008. An expenditure of Rs.25.00 crores is likely to be incurred in the year 2008-09. A Provision of Rs.20.00 crores is proposed for the year 2009-10 for construction work of the remaining part of Gang Canal Feeder RD 31 to 205 and balance distributaries works. The project is likely to be completed by 2009-10.

12.31 An additional irrigation potential will be created in 96.51 thousand hectares, out of which 65.76 thousand hectares has been created up to March 31, 2008.

### **Yamuna Water Project**

12.32 Two separate major projects have been prepared for utilization of 3198 cusec Yamuna water allocated in the 22nd meeting of Upper Yamuna River Board namely (i) Yamuna Water project for Bharatpur district and (ii) Yamuna Water Project for Jhunjhunu and Churu districts. The project is under consideration for approval.

12.33 The payment of Rs. 30.00 lac towards the share of the State to upper Yamuna River Board is to be made, therefore, a provision of Rs. 30.00 lac has been kept for the project in 2008-09; Rs. 30.00 lac is proposed in the year 2009-10.

### **Parwan Project**

12.34 Parwan major irrigation cum drinking water project is proposed to be constructed in Jhalawar District on Parwan River near village Akawad for providing irrigation to 138239 hectare land of Kota, Baran, Jhalawar districts. The total cost of this project is Rs. 1114.00 crores. A provision of Rs.80.00 lacs is likely to be incurred in 2008-09 for survey like forest land compensation, geological investigations; model studies of Parwan dam, compensation of borrow area construction of head works and construction of office and residential quarters for staff. A provision of Rs. 50.00 lacs has been proposed for the year 2009-10.

### **Kalisindh Irrigation Project**

12.35 Kalisindh Major Irrigation project is proposed to be constructed in Jhalawar District of Kalisindh River near Bhanwarasa. The hydrology of the project has been cleared by CWC New Delhi. The project is under consideration for approval. The water of this project would also be utilized for power projects. The cost of the project is Rs 416.76 crores. A token provision of Rs. 0.01 lacs has been kept for the project in the year 2008-09 and a provision of Rs. 0.01 lacs is proposed for the year 2009-10.

### **Medium Irrigation Projects**

#### **Sukli Selwara Medium Irrigation Project**

12.36 Sukli Selwara Medium Irrigation Project is under construction on river Sukali, which is a tributary of river West Banas. The dam site is

located near village Selwara in district Sirohi. The work on the project was started in 2003.

12.37 The estimated cost of the project is Rs. 42.90 crores, out of which an expenditure of Rs. 39.58 crores had already been incurred up to March 31, 2008. The project is scheduled to be completed by 2008-09. In the year 2008-09, Rs. 6.50 crore is expected to be spent on the project. Rs. 0.90 crore is proposed in the Annual Plan 2009-10. The total CCA of the project is 5000 hectare which has been achieved up to March 2008.

#### **Gardada Medium Irrigation Project**

12.38 Gardada medium irrigation project is under construction on river Mangli Dungari & Ganesh Nallah, which is a tributary of river Chambal. The dam site is located near village Polaspura in district Bundi. The project would provide irrigation in an area of 9 thousand hectare. The work on this project was started in 2003.

12.39 The estimated cost of the project is Rs. 83.41 crores, out of which an expenditure of Rs. 74.09 crores had already been incurred up to March 31, 2008. The revised estimated cost of the project is 125.00 crores. An expenditure of Rs. 27.00 crores is likely to be incurred in 2008-09. It is proposed to complete about 80% work on main dam and about 40% work on main canal and distributaries system. A provision of Rs. 9.09 crores is proposed for the project in the year 2009-10. The project is likely to be completed by the end of 2009-10. This project would provide irrigation in an area of 9 thousand hectares.

#### **Bandi Sendra Medium Irrigation Project**

12.40 Bandi Sendra Irrigation Project is under construction on river Bandi, which is a tributary of river Luni. The dam site is located near village Sendra in Tehsil Bhinmal district Jalore. The project was started in 2003.

12.41 The estimated cost of the project is Rs. 37.03 crores, out of which an expenditure of Rs. 30.87 crores had already been incurred up to March 31, 2008. An expenditure of Rs. 3.40 crores is likely to be incurred in the year 2008-09. The project is likely to be completed up to March 2009. Rs. 4.00 crores is proposed for the year 2009-10. The project would provide irrigation in an area of 4.6 thousand hectares.

#### **Takli Medium Irrigation Project**

12.42 Takli medium irrigation cum drinking water supply project is under construction on river Takli, which is a tributary of Amjar River as well as Kalisindh River. The dam site is located near village Dhankya in Kota district.

12.43 The project would provide irrigation facility in an area of 7,386 hectares and drinking water facility to 4 villages and 2 town of Ramganjmandi Tehsil, Kota district. The estimated cost of the project is

Rs. 51.81 crores, out of which an expenditure of Rs. 5.26 crores had already been incurred up to March 31, 2008. An expenditure of Rs. 8.00 crores is likely to be incurred in the year 2008-09. The project is likely to be completed up to March 2012. A provision of Rs. 7.00 crores is proposed for the project in Annual Plan 2009-10.

#### **Piplad Medium Irrigation Project**

12.44 Piplad medium irrigation project is under construction on river Piplad which is a Tributary of Ahu River. The dam site is located near village Sulia Chowki in tehsil Bhawanimandi in Jhalawar Distt.

12.45 The project would provide irrigation in an area of 4,688 hectares in 19 villages of Pachpahar Tehsil. The estimated cost of the project is Rs. 33.64 crores, out of which an expenditure of Rs. 6.32 crores had already been incurred up to March 31, 2008. An expenditure of Rs. 9.50 crores is likely to be incurred in the year 2008-09. A provision of Rs. 7.00 crores is proposed for the project in the Annual Plan 2009-10.

#### **Gagrin Medium Irrigation Project**

12.46 Gagrin medium irrigation project is under construction on river Ahu, which is a Tributary of Kalisindh river. The dam site is located near village Kalapipal of tehsil Pachpahar of Jhalawar district.

12.47 The project would provide irrigation in an area of 7943 hectare. The estimate cost of the project is Rs. 80.12 crores, out of which an expenditure of Rs. 18.88 crores has been incurred upto 3/2008. An expenditure of Rs. 6.50 crores is likely to be incurred in the year 2008-09. A provision of Rs. 6.00 crores is proposed for the year 2009-10. The project is likely to be completed up to March 2012.

#### **Lhasi Medium Irrigation Project**

12.48 Lhasi medium Irrigation Project envisages construction of earthen dam on river Lhasi near village Khajuria Tehsil Chhipabarod district Baran.

12.49 The project would provide irrigation in an area of 5,755 hectare. The estimated cost of the project is Rs. 44.73 crores. An expenditure of Rs. 21.97 crores has been incurred upto 3/2008. An expenditure of Rs. 8.50 crores is likely to be incurred in year 2008-09, and a provision of Rs. 5.00 crores is proposed for the project in the year 2009-10. The project is likely to be completed upto March 2012.

#### **Manoharthan Medium Irrigation Project**

12.50 Manoharthana medium irrigation cum drinking water project is proposed to be constructed in Jhalawar district on Parwan river near village Manoharthana for providing irrigation to 9,800 hectares land of Jhalawar District.

12.51 The estimated cost of the project is Rs. 93.10 crores. An expenditure of Rs. 10.00 lacs is likely to be incurred in the year 2008-09. A provision of Rs. 0.01 lacs is proposed in the year 2009-10. This will include forest loan compensation, Geological investigations, C-Work, office and residential building of Manoharthana dam. The project is likely to be start.

### **Minor Irrigation Projects**

12.52 The minor irrigation projects have low cost and are completed in short gestation period. Such works create potential in arid and semi-arid region of the State, where scope of surface water is limited and the scope of exploitation of groundwater is very limited. An expenditure of Rs. 74.50 crores is likely to be incurred on minor irrigation projects in the year 2008-09; Rs. 90.00 crores is proposed in the Annual Plan 2009-10. Out of this Rs. 27.00 crores have been kept for new AIBP projects in desert/tribal areas.

### **Water Harvesting Structures**

12.53 For conservation of the scarce rainy water and augmentation of traditional resources of water in the State about 48,000 structures had been identified in the year 2006-07. Out of which, 3,293 water harvesting structures works costing to Rs. 421.95 crore has been sanctioned till now; 2300 works has been completed up to March, 2008. An expenditure of Rs. 60.00 crores is likely to be incurred on Water Harvesting Structures. A provision of Rs. 5.00 crores is proposed for these works in the Annual Plan 2009-10. The project has been sanctioned by NABARD under RIDF.

### **GROUND WATER DEPARTMENT**

12.54 The scarce ground water resources in the State are depleting at an alarming rate. Out of 237 blocks, 140 blocks have been come under "over-exploited" category and 50 blocks under "critical" category. This scenario envisages an urgent need to replenish the ground water resources. As such, it is proposed to take up artificial ground water recharge activities on a large scale for sustainable management of ground water resources in the State.

12.55 A provision of Rs. 585.00 lakhs has been proposed for the 11<sup>th</sup> Five Year Plan of which Rs. 0.01 lakhs is kept in the Annual Plan 2008-09; Rs. 75.00 lakhs is proposed in the Annual Plan 2009-10.

### **COMMAND AREA DEVELOPMENT**

#### **Command Area Development & Water Utilisation Department**

12.56 The Command Area Development Programmes aims to bridge the gap between irrigation potential created and its early utilization. This is achieved through the efficient soil, agriculture and water management.

Two Command Area Development Authorities of Chambal & IGNP were set up in 1974. The main objectives of CAD Programmes are as follows

- Efficient utilisation of water minimizing of water losses through lining of canals, increasing canal capacity, installation of control structures, dissemination of improvement techniques.
- Minimizing gains from water use through on Farm Development Works, constructing improved and wider road network, improved agriculture techniques brought about by adaptive research and its dissemination through agriculture extension.
- Equitable distribution of water through warabandi and greater control over canal system as a whole.
- Involvement of farmers in management of irrigation system through Participatory Irrigation Management by their active involvement.

12.57 The major thrust during the Eleventh Plan period will be on the following activities

- Completion of all on-going OFD works in IGNP.
- OFD works in lift schemes of IGNP, Bisalpur Project, Narmada Project.
- Irrigation & Drainage Works.
- Agriculture Extension & adaptive trials.
- Anti water logging Programme.
- Participatory Irrigation Management.
- To undertake new/existing irrigation projects under CADA.

12.58 The rates and limit of per hectare OFD works has been revised by GOI during current year which are as follow :-

Table No. 12.2

S.No.	Name of the project	Limit allowed by GOI	Rates taken in to consideration
1	IGNP	22000	22000
2	SNIP	22000	18000
3	ASSB	22000	18000
4	Bisalpur	15000	15000
5	Chambal	Model 2 15000 Model 7 19000	16000(Average)

12.59 Scheme/project-wise details of the outlays kept in the Eleventh Five Year Plan, likely expenditure to be incurred in the Annual Plan 2007-08 and outlay proposed in Annual Plan 2008-09 are as follows:-

Table No. 12.3

(Rs. in lakhs)

S. No.	Scheme	Eleventh Plan outlay	Anti. Exp. 2008-09	Proposed Outlay 2009-10
1	CAD & WU Deptt.	194.00	44.67	52.08
2.	IGNP, Bikaner	25619.80	2315.05	2680.69
3.	Chambal, Kota	10000.00	4091.00	1902.69
4.	CAD, Bisalpur	4685.00	404.00	1739.79
5.	Mandi Committee, Bikaner	500.00	7.74	0.04
6.	Mandi-Committee, Jaisalmer	525.00	0.00	0.00
7.	CAD - Sidhmukh Nohar	3789.63	488.72	1800.00
8.	CAD - Amarsingh Jassana	3490.60	448.87	1350.00
	Total	48804.03	7800.05	9525.29

### **IGNP, BIKANER**

12.60 Construction of lined water recourses, agriculture extension adaptive research, soil survey, anti water logging and land reclamation works are taken under On Farm Development Works. OFD works are funded under CSS on the matching basis. Construction of lined water courses is likely to be in 1,68,289 hectare against the target of 1,28,000 hectare.
